Hi David,

These would indeed be free – we would cover their salaries while they are visiting with you. I was thinking a week to shadow folks there. Hopefully to cover the "basics" of risk assessment with an emphasis on crop groupings and how data translates within groups, DEEM and its inputs, processing factors, etc.

Regarding timeframes, we are open. I was thinking sometime during March or after that. Just not the week of April 20th – that is the PDP meeting in Albany. Please let me know your thoughts.

Thanks, Diana

Subject: First reactions are positive on the two details

Hi Diana,

Just confirming that these would be free details. We need to know time frames – when would the likely best start and how long would they last with us? We should also put together the goals of what we would like them to learn and what we would like them to do. This is for starters and most of what I heard would be just as easy.

David
